

INDEX
GLENDALE COMMUNITY CEMETERY
Segment No. 4

Segment No. 4 includes graves in a 100 foot central strip in the Cemetery between the upper and lower road.

This segment concludes the indexing of the Glendale Community Cemetery. It has been a huge job. More than 1000 digital images were taken. Some 927 graves were identified and have been indexed with 150 (or more) not being indexed due to deterioration making the markers illegible, broken markers or no markers at all, making a total of 1000 plus graves in this Cemetery. The index shows 83 veterans interred in the cemetery with the marker of one killed in action. Though the graves were not laid out in any sense of uniformity, I have sought carefully to make sure that every legible marker was indexed. Wherein I have failed, I apologize.

XYZ: none

It was a sobering experience to reflect upon the lives and death of relatives and friends of the family as I looked upon their graves, many whom I never saw. Then there were my own personal friends with whom I grew up and attended school. Many were born the same year and even the month in which I was born. Such experiences makes one appreciate the blessings of life more than ever. My only hope is that in the years to come, many will be able to identify with their loved ones resting in the Glendale Community Cemetery.
